# MOODY'S
ANALYTICS

DATA BUFFET® PLATFORM

A powerful solution for accessing economic data & forecasts from Moody's Analytics

The Data Buffet platform enables clients to view, manipulate and automate delivery of forecast and historical data in a variety of formats. Access to our robust, web-based platform is provided to clients with an economic data or forecast subscription from Moody's Analytics.

CONVENIENT DATA MANAGEMENT & DELIVERY

Select, transform and schedule economic time series to be delivered automatically.

- Locate and assemble datasets quickly using search or graphical catalog.
- Operate on economic data and geographies selectively or in bulk.
- Organize, save and schedule baskets of data for delivery to email, ftp and more (at regular intervals or when data change) or use our API.
- Download into 14 file formats, including xls, csv, txt and eViews.
- Apply transformations to meet your needs, including year-over-year %, simple difference, annualized growth, % change, year-over-year difference, or custom transformations.
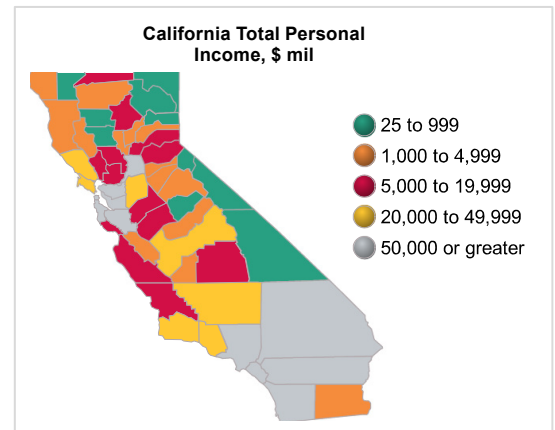

POWERFUL CHARTING

Produce presentation-ready visuals with our flexible charting tools.

- Select a baseline and up to six forecast scenarios.
- Plot up to 10 time series per chart and apply transformations.
- Select from 11 popular chart types, including line, bar and pie.
- Include recession bars, custom stripes, legends and annotations.
- Choose output dimensions and file formats: bmp, gif, jpg, wmf.
- Insert as scalable, refreshable graphic in Microsoft Office.
- Create templates and automate delivery.

GEOGRAPHIC MAPPING

Create thematic maps of economic and financial data for metro areas, counties, ZIP codes, and other geographic areas around the globe.
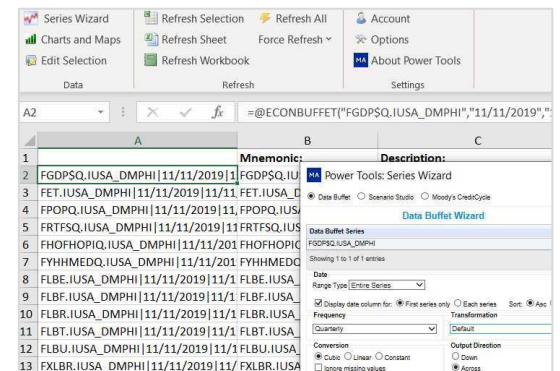

- Change the frequency and transformation.
- Choose a number of intervals—equal value or number of observations.
- Adjust the appearance, add titles and a legend.
- Choose output dimensions and file formats.
- Insert as scalable graphic in your Microsoft Office document.

California Total Personal Income, $ mil

- 25 to 999
- 1,000 to 4,999
- 5,000 to 19,999
- 20,000 to 49,999
- 50,000 or greater

MICROSOFT ADD-INS

Use our Microsoft Office add-ins to insert scalable data, charts and maps into your Office document and refresh data in a single click.

- Transfer graphics between applications while connected to Data Buffet.
- Modify values within Excel and update with one click.
- View underlying data values in Excel and automate delivery.

APPLICATION PROGRAMMING INTERFACE (API)

Our application program interface (API) enables you to retrieve individual series or baskets of data directly into your workflow application or model programmatically.
